Toolkits & Tool Control

Serving the Global Aerospace Industry for over 20 years!

Our story...

At Henchman, we understand that quality products and timely delivery is largely what our customers demand and deserve. Over the last 20 years Henchman has gained respect, loyalty and presence in the industry being fully dedicated to customer satisfaction. We realize that our greatest asset is you, our customer.

Henchman operates a Quality Management System that conforms to the requirements of ISO 9001, reinforcing our dedication to customer service. Henchman has set the benchmark for quality technician's tools to the Aerospace Industry.

Our vision...

- Commitment to impeccable customer service
- Being recognized internationally for the best range of superior renowned tools
- Providing the ultimate "tool buying" experience and after sales support

Introduction to Electronic Tool Control

The henchmanTRAK Tool Control System has been developed by Henchman Products, a global leader in aerospace tooling and tool control. Many years of industry experience supplying a quality range of tooling coupled with in-house production of tool control foam inlays and laser etching, means an established base to take tool control to a whole new level.

HENCHMANTRAK

The system currently consists of four key physical products:

- The kabTrak is an electronically controlled tool cabinet fitted with our patent pending sensor system and an interactive display screen.
- The portaTrak is a unique tracking system for portable toolkits using accurate weight measurement.
- The cribTrak bridges the gap using RFID tagging and/or barcoding to monitor manual tool movement with a scanning system.
- The mobiTRAK is a smartphone App simplifying the management of portable kits on the run.

The henchmanTRAK system is centrally viewable on the cloud for all TRAK variants providing detailed monitoring and reporting on all tool movements across all locations.

- SQL local database on each unit duplicated in central cloud backup
- Cloud-based management console/dashboard
- Track tools against work order/tail number
- Fully control and manage calibrated tooling with records and details
- Manage U/S tooling to avoid downtime
- Can be used for any tooling inventory using standalone bar-code or RFID scanning
- Touch-friendly Windows based system
- Records tool usage data
- Multiple standard and custom reports
- Possible integration with other tool/asset management databases
- Highly configurable with many optional features
- Fully auditable trail of who/when/what tools were used
- Remote administration, configuration and support

- Heavy duty Australian made cabinet with ruggedized 11.6" Windows Tablet interface
- Full touchscreen operation, mounted at front of cabinet
- Tablet secured in dock for easy swap if needed
- Wi-Fi connectivity for live cloud status available from any web browser
- Patent pending instantaneous sensors detect tool presence
- Sensors can detect almost any kind and size of tool down to a ¼ screw-driver insert bit
- No tool modifications required
- Various cabinet sizes, custom configured to your tool list
- One-touch instant lock when finished issuing/returning – just walk away
- Battery back-up for mobility
- Intuitive LIVE layouts on screen show every tool status when drawer is open
- Unique location for every item – must be returned to same cabinet, drawer and location
- Multiple cabinet sizes available, multiple drawer height configurations
- Manual override in event of system failure – use visual tool control foam inlays
- Stand-alone or networked with multiple units in the henchmanTRAK range
- Tail number can be effortlessly entered or a barcode scanner can be attached to scan the works order
- Restrict access to tools overdue for calibration or unserviceable tools

KABTRAK Complete Customised Electronic Tool Controlled Kits

Brand Selection

Henchman is extremely flexible: The choice brand of tool is yours!

In our experience we have found that every discerning engineer admits no “one brand is the best” – a simple example being Knipex pliers is arguably the best plier manufacturer in the world. We are happy to assist you in selecting the “pick of the bunch” and at the same time saving money.

How to order: We can assist with toolists where required.

Toolkit Lists

Henchman has many toolkit lists on file should you require assistance in making up a kit. Having produced toolkits for over 18 years, these lists have proved very valuable to customers even as prompts when making their selections. It seems there are always some unique requirements which is why we offer customised solutions.

Cabinet Sizes

There are two cabinet widths in the kabTRAK range and various heights to suit your needs. The drawers heights can be configured to suit your very needs. We will assist you in selecting a suitable size cabinet to match your tool list.

Foam Tray Selection

Foam trays are made in-house and we can offer a variety of colour combinations of your choice.

Call our experienced sales team today for assistance with your specific requirements.

There are five primary steps for issuing tools from the kabTRAK and returning them. Many additional useful features are incorporated including an interactive screen displaying tool layouts to assist the user to quickly and correctly replace their tools.

Issuing Tools

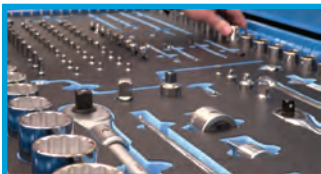

Swipe card to access system.

1

Enter tail number and cabinet unlocks.

2

Remove tools from any drawer. Visual layouts for each drawer will respond instantly as tools are removed providing colour coded user information.

3

Shut drawers and press button to complete transaction/s and lock cabinet.

4

Screen changes to red display TOOLS OUT and by touching the red block you can see what tools are out.

5

Returning Tools

Swipe card to access system.

1

Enter tail number and cabinet unlocks.

2

Return tools to any drawer. A visual indication of outstanding tools, drawer numbers and colour coded layouts are shown.

3

Once transactions are completed, shut drawers and press button to complete the session. Cabinet immediately locks.

4

Screen remains red until every tool from every user is returned, then it changes to a green display TOOLS IN.

5

PORTA^TRAK Portable toolkit management

The portaTRAK is a unique stand-alone tracking system designed to simply and effectively manage portable toolkits in an inexpensive manner. Toolkits include any multiple set of tooling that is held in a toolcrib including but not limited to engineers toolkits.

- Designed for fast issue and return of portable toolkits with multiple items
- Heavy duty Australian made cabinet with ruggedized 11.6" Windows Tablet interface
- Full touchscreen operation, tablet secured in dock for easy swap if needed
- Wi-Fi connectivity for live cloud status available from any web browser
- RFID Reader identifies kit, load cell detects kit contents
- Recognised method of controlling portable kits by official aviation bodies
- Kits can contain almost any kind of items in foam inlays
- Detect missing items down to size of a ¼ insert screwdriver bit

LOKKA^TRAK

The lokkaTRAK extends the capability of the portaTRAK. This customised option incorporates a locker system providing an unmanned and secure storage of portable kits managed through the portaTRAK. This is a customised solution where we suggest you contact our sales team.

There are four primary steps for issuing tools from the portaTRAK and returning them. Many additional useful features are incorporated including an interactive screen providing tool layouts to assist the user to quickly and correctly replace their tools.

Issuing Tools

Swipe card to access system.

1

Enter tail number and portaTRAK awaits kit on plate.

2

Kit is placed on plate. It is then identified and assessed for completeness. It is then issued if it passes, not issued if fails.

3

Screen changes to red display TOOLS OUT and by touching the red block you can see what kits are out.

4

Returning Tools

Swipe card to access system.

1

Enter tail number and portaTRAK awaits kit on plate.

2

Kit is placed on plate. It is then identified and assessed for completeness. System will only receipt kit if it passes as 100% complete.

3

Screen remains red until every kit from every user is returned, then it changes to a green display TOOLS IN

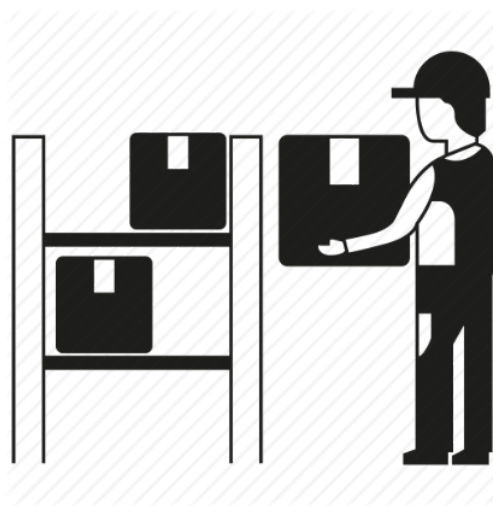

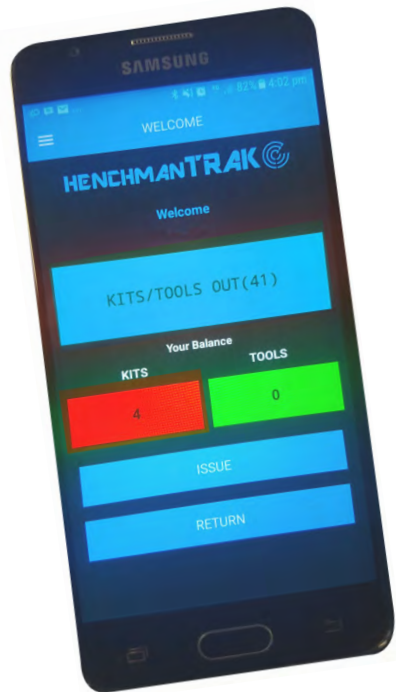

4

Mobile App

The henchmanTRAK App tracks portable toolkits using a smartphone App. This is a scalable system suited to a single engineer right up to very large MRO applications. Seamless control and recording of all engineers work-flow utilising existing personal devices. Kits can be accessed via Bluetooth Lockers and all job records updated in real time.

- Simple, fast and easy to use
- Full recording on cloud with central viewing access
- Removes staff pinch-points in Electronic Tool Control
- All records synchronised to database in real time
- Status of kits against tail number viewed live on dashboard along with other henchmanTRAK family products.

Used in conjunction with Bluetooth-enabled lockers

Software overview

- SQL local database on each unit duplicated in central cloud backup
- Cloud-based management console/dashboard
- Tracks tools against tail number
- Controls and manages calibrated tooling with records and warnings
- Manages U/S tooling to avoid downtime
- Can be used for any tooling inventory using standalone barcode or RFID scanning
- Touch-friendly Windows-based system
- Tool search – location in cabinet, issued user, etc.
- Multiple standard and custom reports
- Possible to integrate with other tool/asset management databases
- Highly configurable with many optional features
- Fully auditable trail of who/when/what tools were used
- Remote administration, configuration and support

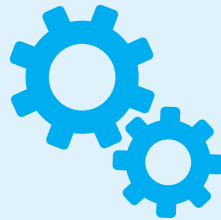

In addition, henchmanTRAK is about to release equipment for Inventory Management of consumable such as drills and Screwdriver bits as well as Vending of PPE and abrasives, etc.

5 reasons to choose HENCHMANTRAK

Fast & Effortless

The system has been specifically designed to cause as little delay to an engineer as possible. In most cases it speeds up the issuing and returning of tools and equipment due to the intuitive displays and effortless system.

Fully Customisable

The system is highly configurable to specific customer requirements. Many options that are already built into the system can be turned on or off to suit. Being Henchman's own software we have the flexibility to make changes where necessary.

Single-Source Supplier

Henchman provides a wide range of tooling, including consumables, mechanical tooling, avionics, structural, fall arrest (specifically aircraft) and GSE tooling. Henchman is a valuable single source supplier covering a very wide base of supply.

Developed with Industry

Henchman has been involved in the aircraft industry for 18 years providing tool kits and tool control. We have closely monitored our customers needs, seen the lack of solutions to their needs and responded accordingly. In doing so, we have been listening closely to our customers needs.

Complete Solution

Henchman has the unique situation of stocking a very wide range of aviation tooling, coupled with the capability of CNC foam cutting and laser marking. We are very flexible, not limited to any brand and can provide Turn-Key solutions.

Henchman ToolKitting Capability – Complete Turnkey Solution

Henchman is widely known as the leading custom case toolkit provider for the aircraft industry globally. Our long experience in customising superbly fitting foam case interiors for a large range of applications allows us to deliver a superior service, product and price.

CNC Cut tool trays

Manufactured from high density Polyethylene (PE) foam and faced with a hard layer of chemical resistant Polypropylene (PP), your individual products are digitised into our CAD software to individual case layouts.

- In-house design and manufacture of foam inserts
- Comprehensive range of aviation tooling
- Wide range of storage solutions
- Laser marking in-house
- Custom made to any configuration
- Kits assembled and supplied complete

Laser Marking

Toolkit numbers can be laser marked onto every tool in the kit as an almost permanent marking. These markings can be simply read to identify which toolkit it has come from. Laser etching combined with henchmanTRAK provides a perfectly effective alternative to barcodes or RFID tags on individual tools.

Inventory lists

Inventory lists can be provided on laminated cards showing the layout and listing of tool contents for easy reference.

List provides relevant information, part number, clear description, quantity.

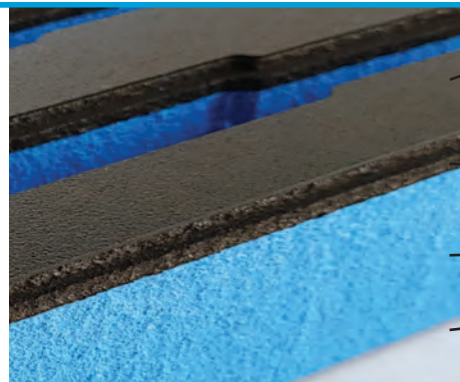

HiViz

Colour coding with HiViz labelling can be offered on request.

Design and layout of two-coloured “shadow” inlays for the toolboxes/ toolsets

Protective Polyethelene layer thermally bonded with small rebate to allow tools in and out easily.

5mm layer black high density foam to maximise the visual toolcontrol contrast comparing tools in against tools out

45 density contrasting Polyethelene foam

1mm Polypropylene layer on underside of lift-out tray to provide some rigidity

Compact LMO Kit

Part No: [LMO3005K](#)

“Small and Compact”, with an excellent assortment of tools essential for basic Line Maintenance requirements. Convenient shoulder strap supplied as an optional extra takes the hassle out of the long walks.

Engineers simply love this kit!

Our standard LAME kit is used extensively by a growing number of airlines and MRO's worldwide.

The tools have been carefully selected based on direct input from the industry. We have put together a kit combining top quality brands of tools which are ideally suited to the mechanical maintenance of an aircraft.

Tools are laid out in two-colour high density foam which provides visual tool control. Excellent for fly-away applications or issued personal toolkit.

LAME Cantilever Toolkit

Part No: [LKBT13A](#)

Dimensions: 560W x 220D x 238H

Extremely compact toolkit developed with a leading Airline company to their requirements. This toolkit is supplied in two-colour high density foam which provides visual tool control for FOD issues.

Selected by LAME's for LAME's.

Features:

- High quality brands such as PROTO, Wiha, Knipex
- Cantilver toolbox for quick visual check
- Visual Tool Control Foam in-lays
- Extremely compact
- Suited to PART 145 compliant organisations

B1 Flyaway Kit Medium

Part No: **LK5122F**

Dimensions: 546W x 347D x 247H

Our standard LAME kit is used extensively by a growing number of airlines and MRO's worldwide. The tools have been carefully selected based on direct input from the industry. We have put together a kit combining top quality brands of tools which are ideally suited to the mechanical maintenance of an aircraft. Tools are laid out in two-colour high density foam which provides visual tool control. Excellent for flyaway applications or issued personal toolkit.

Features:

- A selection of commonly used tools for LAME work
- High quality brands such as PROTO, Wiha, Knipex
- Waterproof, virtually indestructible, Skydrol-resistant case
- Visual tool control
- Extremely compact
- Suited to PART 145 compliant organisations

Mechanical Flyaway Toolkit

Part No: **MK5326F**

Comprehensive mechanical flyaway kit available with a selection of the most commonly used tools. This toolkit is supplied with five trays of two-colour high density foam which provides visual tool control. Convenient portable kit for hangar use or flyaway applications.

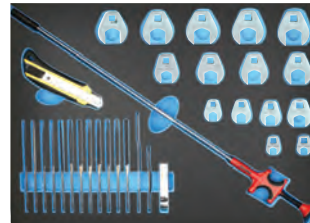

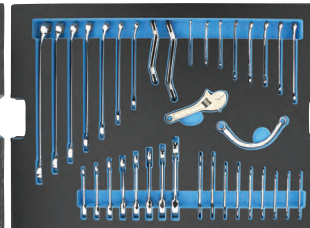

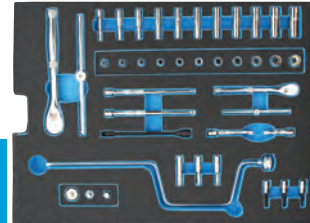

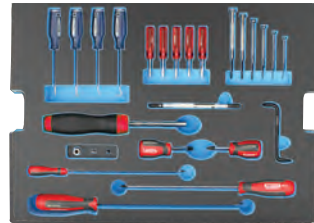

Features:

- A selection of commonly used tools for mechanical work
- High quality brands such as PROTO, Wiha, Knipex
- Skydrol-resistant Case
- Visual tool control
- Suited to PART 145 compliant organisations

Dimensions: 627W x 475D x 292H

B1 Flyaway Kit Large

Part No: MECHKIT-3-SW

Our B1 LAME kit was selected by one of the airlines and has been found to be a very popular selection. This kit can be fitted out to your choice with either Stahlwille Tools (German) or Proto tools (USA), for wrenches and sockets. Henchman prides itself in bringing together a kit combining top quality brands of tools from world renowned manufacturers which meet the expectations of engineers performing daily mechanical maintenance of aircraft.

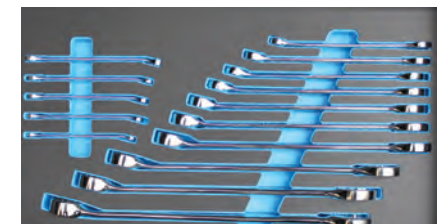

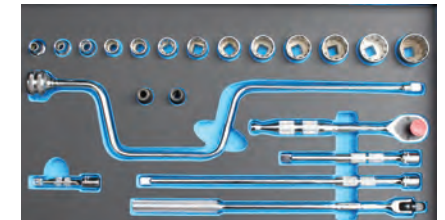

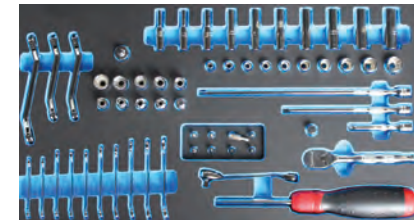

Dimensions: 581W x 381D x 455H

Tools are laid out in two-colour high density foam which provides visual tool control in a robust, easily deployable All-in-One toolbox. Excellent for flyaway applications or issued as a personal toolkit.

Features:

- High quality Brands suiting aviation requirements
- Skydrol Resistant Case
- Visual tool control
- Suited to PART 145 compliant organisations

B1 Flyaway Kit Large – Version B

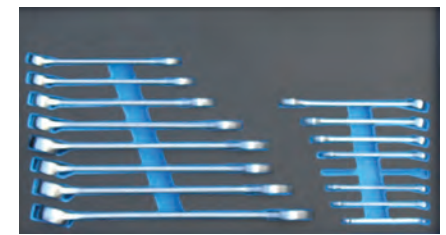

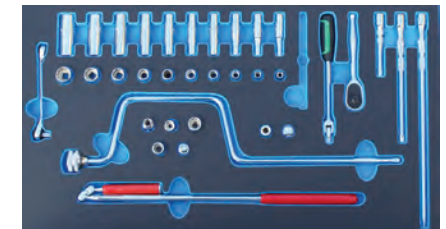

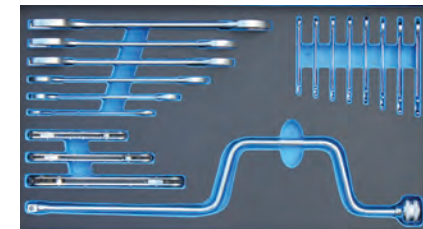

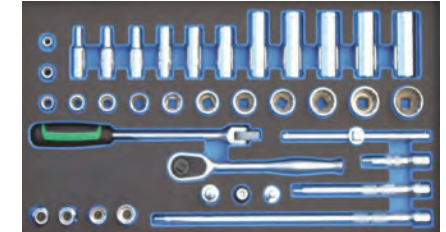

Part No: MECHKIT-3B

Dimensions: 581W x 381D x 455H

The MECHKIT-3B was compiled by a major international MRO and based on their widespread usage, we have made it available. This kit is fitted with a combination of both Stahlwille and Proto tools. Further customisation is possible and Henschman prides itself in bringing together kits combining top quality brands of tools which meet the expectations of engineers performing daily mechanical maintenance of aircraft.

Tools are laid out in two-colour high density foam which provides visual tool control in a robust, easily deployable All-in-One toolbox. Excellent for flyaway applications or issued as a personal toolkit.

B1 Flyaway Kit Large Met/Imp

Part No: [MECHKIT-3-SWLFII](#)

This kit is based on the B1 Flyaway Kit Large, but also contains metric tools. It can be fitted out to your choice with either Stahlwille Tools (German) or Proto tools (USA), for wrenches and sockets. Henchman prides itself in bringing together a kit combining top quality brands of tools from world renowned manufacturers which meet the expectations of engineers performing daily mechanical maintenance of aircraft.

Tools are laid out in two-colour high density foam which provides visual tool control in a robust, easily deployable All-in-One toolbox. Excellent for flyaway applications or issued as a personal toolkit.

Hi-Lok Kit

Part No: **HL4412F**

Task specific kit for removal and installation of Hilok fasteners. Set out in a protective waterproof case, ideal for ultimate protection and storage.

Features:

- A selection of commonly used tools for HiLok installation & removal
- Waterproof, virtually indestructible case
- Visual tool control
- Extremely compact
- Suited to PART 145 compliant organisation
- Dimensions: 474W x 415D x 149H

Oxy Kit

Part No: **3818-OXY**

This Oxy Kit was developed along with a leading international Airline company to be used as generic Oxy Kit for all their aircraft. All wrenches are chrome polished finish for easy cleaning.

This toolkit is supplied in two-colour high density foam which provides visual tool control to combat FOD. Other tool configurations can be customised to suit.

Features:

- High quality brands such as PROTO, Wiha, Knipex
- Cantilver toolbox for quick visual check
- Visual Tool Control Foam in-lays
- Extremely compact
- Suited to PART 145 compliant organisations
- Dimensions: 410W x 340D x 205H

Electrical Connector Maintenance Kit

Part No: [HCT1973A](#)

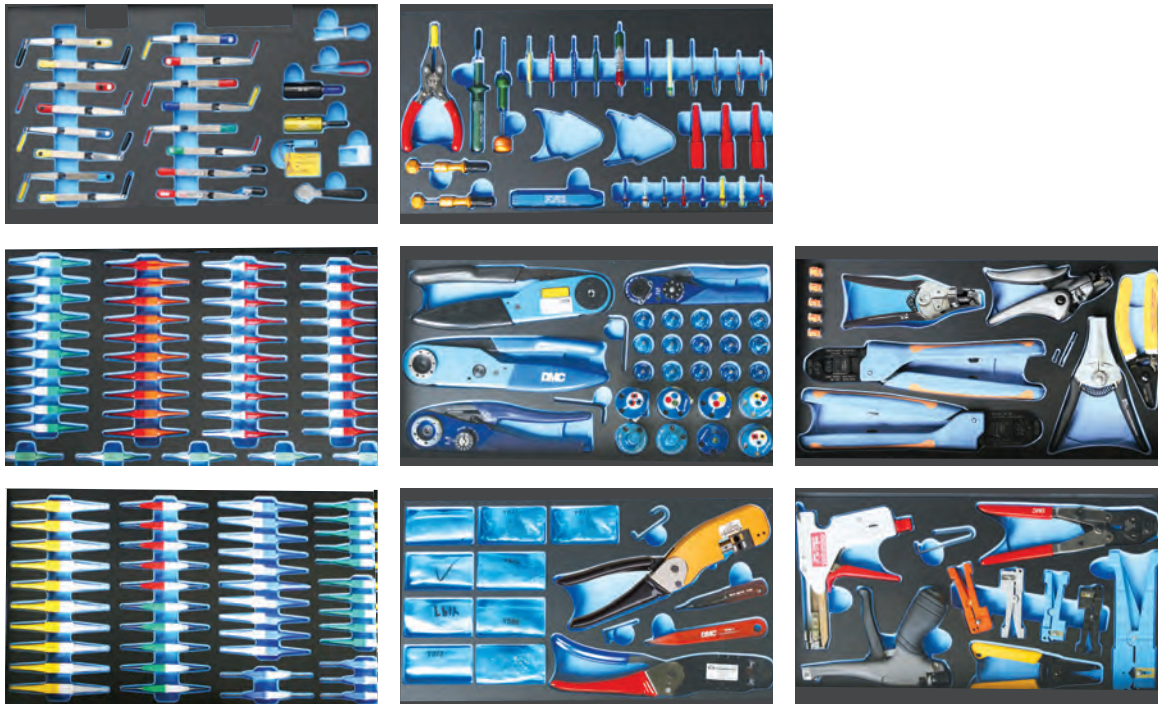

The tools contained in this kit were selected for maintaining the Augusta AW139 helicopter. The tools in this kit may not entirely correspond to the OEM wiring manual but are largely Military Specified tools, in certain cases perhaps more suited to maintenance than production to cover the requirements for the AW139.

Whilst this particular kit is a comprehensive kit, Henschman cannot guarantee that this kit will cover every requirement on the AW139 and from experience have found that it certainly would go very far on many other aircraft. Henschman can customise to your requirements and has done other connector tooling kits in this way which may cover your needs. Henschman takes pride in producing many customised toolkits to meet task specific requirements.

This toolkit is supplied in two-colour high density foam which provides visual tool control in a robust, deployable All-in-One toolbox.

Features:

- Mil-Spec tooling
- Skydrol Resistant Case
- Visual tool control
- Suited to PART 145 compliant organisations

Dimensions: 581W x 381D x 455H

Note: Due to updates and protection of our proprietary knowledge base, tooling lists for our Connector Tool kits are not available for distribution

Wheel Change Toolkit

Part No: [WCKWB-1F](#)

The WCKWB-1F Wheel Change Kit for Wide Body aircraft is fitted predominatly with USA made PROTO tools. Further customisation is possible and Henschman prides itself in bringing together kits combining top quality brands of tools which meet the expectations of engineers performing daily mechanical maintenance of aircraft.

Tools are laid out in two-colour high density foam which provides visual tool control in a robust, easily deployable case with wheels. Excellent for flyaway applications or issued as a personal tool kit.

All foams are cut in-house in our facility by our experienced staff giving you better service, quality and quicker lead times. We also offer laser marking service meaning all your tools can be delivered with your company name and toolkit number, giving even the most basic tool control system a high level of accountability and control.

Dimensions: 546W x 347D x 247H

Sheetmetal Kit

Part No: SHM4111F

The Sheetie toolkit includes a useful selection of commonly used tools for structural maintenance of aircraft. It covers a pretty comprehensive range of air tools, riveting tools, temporary fasteners and drills set out on convenient holders, and hand tools. This toolkit is supplied in two-colour high density foam which provides good visual tool control to prevent FOD issues

Excellent for maintenance applications in the hangar.

Features:

- A selection of commonly used tools for mechanical work
- High quality brands such as PROTO, Wiha, Knipex
- Heavy Duty Rollcab
- Visual tool control
- Suited to PART 145 compliant organisations

Dimensions: 1056W x 460D x 1033H

Comprehensive Aircraft Structures Kit

Part No: [AST1010P8](#)

Multi-user structures kit set out in a sturdy Australian-made tool cabinet. Whilst this selection covers a good portion of commonly used tools for structural maintenance of aircraft there is still some space available yet to add in any extra personalised requirements.

This toolkit is supplied in two-colour high density foam which provides good visual tool control to prevent FOD issues.

Excellent for maintenance applications in the hangar.

Dimensions: 1010W x 1015D x 755H

Part No: 3007RC-BK

The Commando Tool Cabinets are made to order by Henschman Aerospace to our specifications which make them one of the highest quality and best value boxes on the market. Constructed from 1.0mm steel which gives the cabinet a lot more strength (and weight), the Commando Cabinets are fitted with quality ball bearing slides, solid aluminium drawer handles and heavy duty, easy locking casters.

Features:

- Polished aluminium drawer handles
- Polished aluminium side trims
- 100LB ball bearing slides for easy and smooth drawer opening & closing
- Black MDF work top
- Heavy duty 5"x2" PU casters, 2 swivel with brakes, 2 rigid
- 5 Drawer Int: 617W x 418D x 51H (mm)
- 1 Drawers Int: 617W x 418D x 216H (mm)
- 1 Drawers Int: 617W x 418D x 201H (mm)

Tool Wagon

Part No: **TC2700B**

The Henschman Toolwagon is fully engineered and purpose-built for aircraft maintenance. The wagon can be forklifted for deployment requirements and is fitted with tie-down points for transport. The wagon is produced in a zinc coated steel for corrosion resistance with stainless steel covered top and running boards for added protection. Initially this unit was designed for the Royal Australian Air Force but has been well accepted by airlines and MRO's. It can be supplied as a fully kitted out toolwagon complete with tools.

Features:

- Robust, all steel construction
- Ball Bearing Roller Drawers
- Slam Catches fitted to Drawers
- Tie-Down Points

- 1 Drawer, Height: 150mm Left
- 2 Drawers, Height: 75mm Right
- 4 Drawers, Height: 100mm Right
- 1 Drawer, Height: 200mm Right
- Other combinations of drawer sizes available

Dimension 2.655mW x 1.0mD x 1.82mH excluding the draw-bar

Flightline Toolboards

Part No: [TKFL2600](#)

Features:

- Robust, all steel construction
- Ball Bearing Castors
- Double-sided A-Frame (single optional)
- Pull down polycarbonate clearview locking doors
- Velcro attached foam panels for easy modification
- Add the tools needed for your specific needs

Dimension: 2020W x 755D x 2570H

A-Frame Modular Toolboards

Part No: [MAFTB-3](#)

Features:

- Unique Henchman product
- Solid powder-coated steel frame
- Flat-pack shipping
- Pull-out rear wheel for support when relocating unit.
- Optional adjustable feet for permanent locations
- Multiple boards can be joined depending on storage space required
- Add the tools needed for your specific needs

Dimension: 990W x 460D x 1975H
