

Standard MANOSKOP® torque wrenches w. permanently installed ratchet

721/20 Quick

Art.No. 50204020
GTIN 4018754268931
Model 721/20 QUICK

Label. Torque wrench MANOSKOP No. 721/20 Quick Measuring-R. 40-200Nm Output 1/2" L. 483mm

Features. click-type
the measuring element is only under load while force is being applied, no need for manual reset to zero
rapid setting thanks to easy-action locking lever in the handle
ergonomically designed, non-slip adjuster with a thumb recess
dual stop signal
twin scales N·m/ft·lb
optimised convex handle for strain-free working
any force applied to the tool after the 'click' or applied in the opposite direction to the current function – e.g. forcible loosening of a jammed screw - does not act on the trigger mechanism and cannot cause damage to it
all the sensitive components are protected by the sturdy tubular steel housing
calibration using perfectControl® calibrating unit No 7794 or calibration system No 7706. Readjustment does not require disassembly.
certificate in accordance with DIN EN ISO 6789-2:2017
display deviation value ± 4%

Advantages.

Made in Germany – STAHLWILLE release torque wrench, ratchet with punch square, length 483 mm, with calibration certificate (DIN EN ISO 6789-2:2017), 50204020

Lightning-fast and precise torque adjustment

Patented, low-wear release system with bending rod

Continued loading after release or loading in the opposite functional direction will not damage the torque wrench

STAHLWILLE: For over 160 years, we as a traditional German company from Wuppertal have stood for tools that are appreciated around the world for their excellent quality

Product highlights.

Flexible rod principle.

Mechanical torque wrenches from STAHLWILLE have a wear-resistant trigger system with a flexible rod. In contrast to conventional torque wrenches with spiral springs, the STAHLWILLE system eliminates one key work step: once the fastener has been tightened, it is not necessary to reset the wrench to »0«.

Protected.

The internal mechanism is extremely resistant to mechanical wear and well protected against dirt and soiling inside the outer housing.

Wear-resistant.

Wear resistant trigger system with a flexible rod. In contrast to conventional torque wrenches, it is not necessary to reset the wrench to zero after each job to unload the spring. In this way, users benefit from long-term accuracy and safe measurement results with less time required.

Fast.

Rapid setting thanks to the easy-action locking lever in the handle. Ergonomically designed, non-slip adjuster with a thumb recess for fast, safe setting of the slider.

Simple.

Quick adjustment from outside, no disassembly of the torque wrench required, with two adjustment points for the maximum & minimum values.

Technical Drawing.

Technical Attributes.

Output square drive outside (inch) 1/2"

Logistics data.

Length (IFS) 490
Width (IFS) 45

b1	28 mm	Height (IFS)	45
