DustMaster Electric & Pneumatic ULPA Vacs

Available in both **electric** and **pneumatic**, the DustMaster Series ULPAvacs are our most powerful solution for portable dustless sanding, dust extraction, and general cleanup. They are designed for the removal of coatings containing Hexavalent Chromium (Cr VI), lead, cadmium and other heavy metals, carbon fibe, ceramic dust, fiberglass and mold These units are portable, and include features for the most demanding applications. All components are extra heavy duty to ensure long life and extreme durability for industrial and military environments.

Three Stage Filtration -

Stage 1: Filter Bag. Change as needed.

Stage 2: Pre-filter is 95% efficient @ 0.3 µ Change once a year or when Minihelic reads above 5.

Stage 3: ULPA Filter is 99.9995% efficient @ 0.12 μm (U15). Change when magnahelic reads above 5 with a new pre-filter

installed. With proper maintenance and use. this filter will last several years.

Stage 2: Pre-filte

Stage 1: Filter Bag

Patented Safe-Filter-Change

This unique Clayton design allows workers to change disposable filters in complete safet .

- Leave vacuum running while changing filter bag; downdraft into pre-filter contains any dust trying to escape, preventing worker exposure.
- Leave vacuum running while changing pre-filte , downdraft into ULPA filter contains any dust trying to escape, preventing worker exposure.

Pre-filter chang

Twin Vacuum Motors

Our Electric and Pneumatic DustMaster Vacuum systems both employ dual vacuum motors for unmatched performance and support for up to 3 simultaneous users.

Auto On / Off -

Compressed air is an expensive part of running any operation. Facility managers and engineers know the real cost of compressed air is significant. The electricity required to operate large screw compressors is a huge part of the daily operating expense for a shop or hangar.

We've observed in many facilities air powered vacuums left running continuously, reducing available pressure to the facility, and putting a heavy and continuous strain on the compressor. Our engineers have put years of research and development into the design of the industry's first automatic tool sensing all pneumatic vacuum - available only from Clavton.

All pneumatic DustMaster vacuums and systems have an Auto On/Off feature which allows the vacuum to start when any connected sander, grinder, etc. is started, and an adjustable shut off delay keeps the vacuum running for up to 60 seconds after the tool is stopped.

- Vacuum can be set to ON for continuous run
- AUTO for tool actuated mode
- Shut off delay adjustable from 5 to 60 seconds

Gauge Panel

Our gauge panel helps you monitor the health and performance of your DustMaster system.

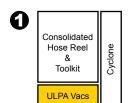

Our Auto On/Off System Pressure acts as a countdown monitor. When a connected tool is actuated the Auto System is pressurized. When the tool is stopped the shut off delay bleeds air from the Auto System and the pressure counts down to zero at which time the vacuum shuts off.

To help monitor the ULPA filte , our Minihelic compares the pressure on either side of the filte . As particles build up in the ULPA filte , the pressure difference increases. When the gauge is in the red, it's time to change the ULPA filte . With proper maintenance of the pre-filter and bag filters, the U A filter should last several years.

Since the DustMaster has a built in manifold for providing compressed air to your tools, it's helpful to see the Air Supply Line Pressure. This lets you know if your compressor is keeping up with demand. In a properly operating system with an adequate air supply, this gauge should remain between 80 and 100 psi.

The DustMaster System is available in 5 configuration

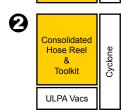

These configurations build on one another by adding components of the DustMaster system. These components interlock to form a single standalone unit.

The DustMaster ULPA Vacuum is available as a standalone unit. This is the Heart of the DustMaster System.

DustMaster Vacuums

	Model	NSN	Power	Weight lbs (kg)	Price
Г	DM-100	7910-01-520-6439	Electric	84 (38)	
	DM-104	7910-01-520-6436	Pneumatic	77 (35)	

The Consolidated Hose Reel & Toolkit (CTK) provides storage for vacuum hoses, compressed air lines, sanders, tools, and abrasives. It's available with or without casters, and can ride atop the vacuum.

CTK Only

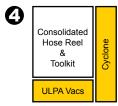

Model	NSN	Power	Weight lbs (kg)	Price
650-201	5140-01-520-8551	CTK without Casters	100 (45)	
650-301		CTK with Casters	108 (49)	

In this configuration the Consolidated Hose Reel & Toolkit (CTK) rides atop the vacuum creating a single unit for easy deployment and storage.

DustMaster Vacuums (CTK)

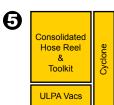

Model	NSN	Power	Weight lbs (kg)	Price
DM-100CTK		Electric	184 (83)	
DM-104CTK		Pneumatic	177 (80)	

Our Cyclonic pre-separator is an add-on unit that captures 99% of debris before it gets to the primary filter bag. This means fewer filter changes and less loss of suction.

DustMaster Systems (Cyclone)

DustMaster Electric Vacuums

Features

- Supports up to 3 users with optional Y adapter
- Uses a single compressed air line and an internal manifold to supply 3 users with compressed air
- · Safe-Filter-Change protects users from exposure to hazardous dust when changing filter
- Self closing vacuum port prevents hazardous dust from escaping when not in use
- · Low profile design won't ti
- · Lightweight aluminum chassis
- · Heavy duty dual electric motors
- ULPA Filter is 99.9995% efficient @ 0.12 μm (U15
- · Each vacuum certified leak fre
- Pre-filter protects UL A filter for longer lif
- · Includes all filters and bag

DustMaster Consolidated Tool Kit & Hose Reel

The Consolidated Tool Kit & Hose Reel provides storage for three vacuum hoses. The top of the CTK is a shadowboxed tool tray which holds sanders and tools. Every item is tethered or shadowed, so tool control can be easily maintained. Each compartment is lockable for tool security.

Consolidated Hose Reel Toolkit **ULPA Vacs**

The CTK is available with wheels as a standalone unit or without wheels for mounting on a Clayton DustMaster Vacuum.

Includes:

- All steel powder coated construction
- · Heavy duty tie down rings
- Foldable hose reel crank handle
- · Heavy duty lift handles
- · Gas springs hold lid open
- Large 5" locking casters on 650-301
- · Lockable hasps
- · Three position hose reel
- · Two color shadow box foam

Hose reel provides storage for up to three 30' combination air/vacuum hoses.

DustMaster CTK Systems

The DustMaster CTK Systems combine a DustMaster Electric or Pneumatic vacuum with a CTK to form a single self contained portable unit with space for hoses tools and abrasives in a single place. This makes deployment and storage a one man job.

Consolidated Hose Reel & Toolkit

Features

- Supports up to 3 users
- Use a single compressed air line and an internal manifold to supply 3 users with compressed air
- · Self closing vacuum port prevents hazardous dust from escaping when not in use
- Heavy duty dual motors
- ULPA Filter is 99.9995% efficient @ 0.12 μm (U15
- Pre-filter protects UL A filter for longer lif
- · Includes all filters and bags for turnkey operatio

The DustMaster Turn-Key Kits

This turn-key kit includes tools, hose, and abrasives.

660-DM-1000-4 (pneumatic) / 660-DM-1000-0 (electric)

This DustMaster System is ideal for maintenance on both airframes and ground support equipment. A core set of tools provides flexibility to tackle larger surfaces like the wing or fuselage, or tighter areas and curves, like rotor blades or munitions. Multiple hoses and tools allow up to three artisans to work simultaneously

- DustMaster ULPA Vacuum with patented Safe-Filter-Change.
- · Consolidated Tool Kit (CTK) with shadow-boxed two-color foam
- One 2" Grinder kit with abrasives and accessories
- Two 3" Random Orbital Sanders, backup pads, protector pads, & 750 sheets of 3" abrasive
- Two 6" Random Orbital Sanders, backup pads, protector pads, and 750 sheets of 6" abrasive
- Two 20' Air/Vac work hoses, One 30' Air/Vac work hose
- · One Compressed air supply line, and a complement of fitting

660-DM-1000-0		Electric	

670-DM-1535-4 (pneumatic) / 670-DM-1535-0 (electric)

This DustMaster System contains a robust set of tools selected by NAVAIR maintainers to support all types of aviation assets during long deployments. Multiple hoses and tools allow up to three artisans to work simultaneously.

- DustMaster ULPA Vacuum with patented Safe-Filter-Change.
- Consolidated Tool Kit (CTK) with shadow-boxed two-color foam
- Two 3" Random Orbital Sanders, backup pads, protector pads, and 1000 sheets of 3" abrasive
- One 3x4" Orbital Sander, backup pads, and 500 sheets of 3x4" abrasive
- One 3-2/3 x 7" Orbital Sander, backup pads, and 500 sheets of 3-2/3 x 7" abrasive
- Two 6" Random Orbital Sanders, backup pads, protector pads, and 1000 sheets of 6" abrasive
- Two 20' Air/Vac work hoses, One 30' Air/Vac work hose, Two Hose support belts
- One Compressed air supply line, and a complement of fitting
- Complement of Filter bags, Pre-filters, and aste disposal bags

DustMaster Filters

Clayton ULPA are engineered to provide maximum protection from hazardous dust. ULPA Filter is 99.9995% efficient @ 0.12 μ m (U15). These filters are the ideal solution when working with chromated primers, lead paints or composites.

Clayton Pre-filters have been designed to prolong the life of the UL A filte . Pre-filters provide protection from larger particles which might escape when a bag filter is installed incorrectly or has sustained damage

Disposable bag filters are the first stage of filtration on most Clayton vacuum These vacuum bags are designed to capture larger particles and debris. Most are manufactured with a lining to resist 'caking' of dust on the inside of the bag. Bag filters are intended for single use
